

Over 80 businesses now supported by Growing Corby

In late September, we announced our latest figures for businesses that have received support from Growing Corby. Six months in, we have now awarded 50 grants of between £1,200 and £2,500, provided 24 businesses or individuals with free market research, supported 27 social enterprises and organised three internships worth £3,000 each.

These services have directly funded business development, provided extra manpower needed to get projects off the ground and supplied companies with the expertise and market research needed for sustained growth.

The Growing Corby support is available until June 2015 so find out how your business can benefit now.

New grant for expansion and location

Earlier this month, we unveiled some exciting news regarding a new grant offering available through the Growing Corby programme. Businesses can now apply for a grant worth £2,500 to help them relocate, open a new branch or premises in Corby, Northamptonshire, easing the cost burden of expansion.

Available from business growth initiative Growing Corby, in partnership with Angle Technology, the new grant can be used to cover costs including the purchase of IT equipment or software, marketing activity, premises fit-outs, removals, or the purchase of business-related production equipment.

If you are thinking of relocating or know someone who is, find out more about this exciting scheme today.

Discover how you innovation can help marketing

NN CoNnect - Networking Open Day

Another workshop in the Growing Corby innovation series is due to take place in just under a week. On Monday 20th October, businesses in Corby and the surrounding area are invited to discover how the latest innovations in marketing and how these can be used to help their business grow.

Marketing has undergone some huge changes within the last few years and has led the way in the "art of doing something new". This session will look at the new ways of marketing both online and offline and provoke you to think differently about the way you market your business.

The event also includes a free networking lunch for those attending. However, in order for us to cater for accurate numbers, we would kindly ask that you register your attendance online.

In a recent survey by Business Networks, 87% of respondents said that business networking events have had a positive effect on their business. Now it is your turn to try!

On Tuesday 21st October, NN CoNNeCt are holding an open day for businesses to experience networking for the first time. This is your opportunity to speak to local businesses and share your expertise on your area of business. A full agenda of the activity is available on the NN CoNNeCt website and there will be 50% off the usual meeting fee.

Members of the Growing Corby team will also be in attendance to discuss their services further.

Places will be limited so book your place today.
